

SEMINAR

"MAKING WATER DO MORE IN THE HOTEL / MANUFACTURING INDUSTRY"

August 18, 2018

Environmental concerns are raising their ugly head everywhere. Despite receiving heavy rains, Goa is facing acute water shortages. Establishments and residents have to resort to bore wells for their daily needs of water. Saline water is gradually seeping inland – which will have a deep impact on the Society. It's time to stop wastage of all resources. The days of Linear Economy are over. The "Circular Economy" has to kick in. Sustainable Management of Resources is the crying need of the hour. "Recycling" is the most natural principle of Nature. We need to go back to Nature and adopt recycling. Israel, for instance, recycles water multiple times, before it is allowed to flow into the sea.

The Seminar hence, aims to sensitize hotels and other major users of water & natural resources, to quit the Linear Economy and adopt "Circular Economy / Green Practices", offering ideas to overcome / mitigate this problem.

PROGRAMME
